

Behavior Analyst Certification Board Receives NCCA Accreditation of RBT Credential

For Immediate Release

LITTLETON, Colorado --- January 6, 2016 --- The Behavior Analyst Certification Board (BACB) (<http://www.bacb.com>) has received accreditation of its Registered Behavior Technician (RBT) credential by the National Commission for Certifying Agencies (NCCA).

NCCA is the accreditation body of the Institute for Credentialing Excellence (<http://www.credentialingexcellence.org>) and its accreditation helps demonstrate that a credential has met the rigorous standards established by the credentialing industry. The BACB's Board Certified Behavior Analyst (BCBA) and Board Certified Assistant Behavior Analyst (BCaBA) credentials have been NCCA accredited since 2007.

Speaking about this new achievement, the BACB's CEO James E. Carr, PhD, BCBA-D stated, "The RBT is the first behavior technician credential to become accredited based upon NCCA's current heightened standards, which were enacted in 2016. This development means that the BACB is now the only organization in behavior analysis to offer professional credentials at every educational level (graduate, undergraduate, high school), all of which are accredited by NCCA."

In almost 20 years of operation, the BACB has credentialed over 53,000 individuals worldwide: approximately 28,000 RBTs and 25,000 BCBA and BCaBAs.

The BACB:

The Behavior Analyst Certification Board, Inc. (BACB) is a nonprofit 501(c)(3) corporation established in 1998 to meet professional credentialing needs identified by behavior analysts, governments, and consumers of behavior analysis services.
